

I am writing on behalf of K-LOVE radio network. K-love reaches me out of Clinton, MO, and it is a big influence in my life. I want to work the the network someday, as I am still in high school now. Klove offers me a chance to listen to Christian music without having to deal with commercials or advertisements. If Klove is replaced by an LPFM signal, the many people I know that listen to Klove, as well as myself, will be disappointed. Klove provides broadcasting that is good for the whole family, and it builds up morallity and ethics in the atmosphere of it's listeners. Klove offers people a place to come, and people to talk to, that most people would not find elsewhere. It serves the public interest, the church in particular. Don't replace my Klove signal with something else. I urge you.
